## BUSINESS ANALYST

Technical Business Analyst with a strong engineering and software development foundation, evolved from hands-on development into owning end-to-end product delivery in Agile and SAFe environments. Experienced in working across front-end, back-end, and customer support layers, ensuring that real user needs are translated into clear, buildable solutions. Acts as a delivery and ownership hub between business, engineering, and customers, driving work from discovery to production. Highly adaptive to fast-changing industry and product needs, leveraging SQL, system analysis, and AI-assisted tools to improve decision-making, delivery flow, and customer outcomes.

## KEY COMPETENCIES

- Business Process Analysis
- SDLC & CI/CD
- UML/BPMN
- Agile/Scrum/SAFe
- SQL
- System & Data Validation
- Configuration Management
- API & Backend Integration
- Python
- JavaScript/TypeScript
- AWS Lambda
- Git

## EXPERIENCE

### Technical Business Analyst

Ankara · 07/2025 · Present

#### Etiya Information Technology

- Analyzed business processes and system behavior to identify gaps, optimize workflows, and support scalable solution design.
- Used SQL and AI-assisted analysis tools to validate data, manage configurations, and accelerate customer-driven decisions, delivering 10-15% faster turnaround on changes and enhancements.
- Coordinated SAFe PI Planning and cross-functional workshops with development and design teams to align customer needs with delivery plans.

### Business Analyst

remote · 08/2023 · 06/2025

#### DoctorBoxPro GmbH

- Owned feature delivery in a startup environment by bridging business, engineering, and customer support from idea to production.
- Translated customer and business needs into clear user stories, scope, and acceptance criteria for development teams.
- Worked closely with developers and designers to shape UI and system behavior based on real user feedback.
- Supported testing, UAT, and production validation, feeding live issues and insights back into the product backlog.

### Freelance Developer

remote · 06/2022 · Present

#### Upwork

- Extracted and processed data from various websites using Python to meet client requirements.
- Developed applications and bots with Python and React/Next.js.

### Bonding and Welding Process Engineer

Ankara · 09/2018 · 06/2021

#### MAN Truck & Bus

- Solving problems in a production line quickly while detecting the source of the problem then developing a permanent solution by root cause analysis.
- 15% of process time decreased in the first year with line balancing in city buses. Also, 8% cost decrease in responsible lines with new bonding methods and equipment in premium buses.
- 78% of errors in assembly lines were prohibited in the assembly line with the new documentation methodology.

## EDUCATION

- **Software Engineering** 2021-2022  
Strive School Mastercamp
- **Mechanical Engineering B.S.** 2012-2018  
Ankara Yildirim Beyazit University

## LANGUAGE

- Turkish Native - English Fluent - Spanish Beginner

## VOLUNTEERINGS & HOBBIES

- Volunteer in an animal shelter.
- Participant of D52 Drum Fest as a technical crew member.
- Bird watcher, basketball and badminton player, PC gamer
